Progressing in a Company Setting

ABSTRACT: Having held five different jobs in five and a half years, Heather has a unique perspective on successful transitions and how to self-manage in order to accelerate your learning curve with each new job. She will step through her multiple transitions and provide practical career advice, insight into an industry setting, and reflect on lessons learned in the process.

BIOGRAPHY: Heather Milligan graduated from the Chemical Engineering undergraduate program in 2013, and has since worked at the Phillips 66 Ferndale Refinery. Heather has held many different positions in Process Engineering, Commercial Planning and is currently the Process Engineering Supervisor.
